Composite Structures **27** (1994) 472–474

Contents of Volume 27

Numbers 1 & 2

1 Preface

3 The evolution of design and material criteria for polymeric structural materials
J.C. HALPIN (USA)

7 Development of new polymeric matrices for high performance composites
J.E. McGRATH, H. GRUBBS, M.H. WOODARD, M.E. ROGERS, A. GUNGOR, W.A. JOSEPH, R. MERCIER & A. BRENNAN (USA)

17 A new semicrystalline, thermoplastic polyimide for carbon-fiber reinforced composites
F.W. HARRIS, H-.S. LIEN, P.A. GABORI, Y. ZHANG, T.M. CHALMERS, A. ZHANG, D. SHEN & S.Z.D. CHENG (USA)

25 Novel thermoset resins cured via charge donor-acceptor reactions
S.J. HUANG, D.M. WILSON, L-.H. HO, K.D. JONES & A.T. DIBENEDETTO (USA)

37 Rigid rod networks: Liquid crystalline epoxy resins
C. CARFAGNA, E. AMENDOLA & M. GIAMBERINI (Italy)

45 The kinetics of volume relaxation and related property changes during physical aging of poly(ether ether ketone) (PEEK)
A. D'AMORE, A. POMPO (Italy), J. MIJOVIC (USA) & L. NICOLAIS (Italy)

51 Determination of residual stresses using incremental linear elasticity
A. PLEPYS, M.S. VRATSANOS & R.J. FARRIS (USA)

57 Characterization of structural adhesives for load-bearing composite structural applications
K.J. AHN, Y.S. EOM, Y.T. SHIM (South Korea) & J.C. SEFERIS (USA)

65 Adhesion to carbon fiber surfaces: Surface chemical and energetic effects
L.T. DRZAL, M. MADHUKAR & M.C. WATERBURY (USA)

73 Reactive coupling of fibers to engineering thermoplastics
A.T. DIBENEDETTO, S.J. HUANG, D. BIRCH, J. GOMEZ & W.C. LEE (USA)

83 Rheology of short-fiber composites: A systematic approach
S.E. BARBOSA, D.R. ERCOLI, M.A. BIBBÓ (Argentina) & J.M. KENNY (Italy)

93 The interaction between micro– and macro– scopic flow in RTM preforms
R.S. PARNAS, A.J. SALEM, T.A.K. SADIQ, H-.P. WANG & S.G. ADVANI (USA)

109 Mold filling and cure modeling of RTM and SRIM processes
L.J. LEE, W.B. YOUNG & R.J. LIN (USA)

121 Thermal, mechanical and rheological evolution during the processing of multilayer thermosetting composite structures
A. APICELLA, M.A. DEL NOBILE, G. MENSITIERI, M. MONTANINO & P.R. STUPAK (Italy)

129 Application of modelling to the control and optimization of composites processing
J.M. KENNY (Italy)

141 Filament winding process models
S.C. MANTELL & G.S. SPRINGER (USA)

149 Melt impregnation parameters
P. PELTONEN & P. TÖRMÄLÄ (Finland)

157 Optimization of stamp forming of thermoplastic composite bends
M. HOU, K. FRIEDRICH & R. SCHERER (Germany)

Composite Structures (**27**) 1994 — © 1994 Elsevier Science Limited, England. Printed in Great Britain

169 Product development and manufacturing process for a safety critical automotive component
J.A. WOELFEL & E.R. SPENCER (USA)

181 CFRP stiffened panels under compression
A. BUCCI & U. MERCURIO (Italy)

193 The evolution of an aerospace material: Influence of design, manufacturing and in-service performance
A.G. MILLER, D.T. LOVELL & J.C. SEFERIS (USA)

207 The design, fabrication and testing of the Glasshopper prototype covered hopper rail cars
D.C. RUHMANN (USA)

Number 3

215 Dynamic residual property predictions for laminated composite structures: FE-based internal state variable approach
J.J. ENGBLOM & Q. YANG (USA)

225 Higher order cylindrical panel relationships considering general ply layups
K.V. TIGHE & A.N. PALAZOTTO (USA)

243 A simple model for moisture sorption in epoxies with sigmoidal and two-stage sorption effects
W.P. DE WILDE (Belgium) & P.J. SHOPOV (Bulgaria)

253 Application of a simple hole damage stress analysis method to composite airframes: Case studies
R.B. HESLEHURST (Australia)

261 Lateral and distortional buckling of pultruded I-beams
E.J. BARBERO & I.G. RAFTOYIANNIS (USA)

269 The failure of integrally stiffened graphite/epoxy cylinders
M.J. GRAVES & A.J. SAWICKI (USA)

283 A finite strip analysis of the buckling characteristics of some composite stiffened shear panels
J. LOUGHLAN (UK)

295 Finite element analysis of curved thin-walled laminated channel structures
S.H.-Y. LAI (USA)

317 Transverse shear stiffness of structural core sandwich
T. NORDSTRAND (Sweden), L.A. CARLSSON (USA) & H.G. ALLEN (UK)

331 Dynamics response of a simply supported sandwich beam subjected to impulsive loading
K.Y. LAM & L. CHUN (Singapore)

Number 4

339 A finite element for the linear analysis of laminated circular plates
G. H. THIEL & R. E. MILLER (USA)

357 On the scaling of impact loaded composite beams
P. PINTADO (Spain) & J. MORTON (USA)

367 Instability of moderately thick, laminated, cylindrical shells under combined axial compression and pressure
J. S. ANASTASIADIS, A. TABIEI & G. J. SIMITSES (USA)

379 A design study into the delamination behaviour of tapered composites
D. M. THOMAS & J. P. H. WEBBER (UK)

389 Thermal damage effects on mode II interlaminar fatigue crack propagation of graphite/epoxy composites
J.-R. HWANG & A.-S. LEE (Taiwan)

395 On the validity of nonlinear shear deformation theories for laminated plates and shells
M. S. QATU (USA)

403 Geometrically non-linear analysis of symmetrically laminated composite and sandwich shells with a higher-order theory and C^0 finite elements
T. KANT & J. R. KOMMINENI (India)

419 Three dimensional exact solution of thermal stresses in rectangular composite laminate
V. B. TUNGIKAR & K. M. RAO (India)

431 Theoretical and experimental response of composite laminates with delaminations loaded in compression
D. S. CAIRNS, P. J. MINGUET & M. G. ABDALLAH (USA)

439 Initial and progressive failure analysis of laminated composite structures under dynamic loading
A. BOGDANOVICH (Latvia) & K. FRIEDRICH (Germany)

457 Crack growth and residual strength characteristics of two grades of glass-reinforced aluminium 'Glare'
J. B. YOUNG, J. G. N. LANDRY & V. N. CAVOULACOS (UK)

471 Announcement
